

RTD Thermometers

TEGAM's 868/869 100 Ω RTD thermometers, the only handheld RTDs that accept three-wire and four-wire platinum probes, and provide repeatable accuracy of 0.3 °C. With exceptional accuracy and the same repeatability and long-term stability of our thermistor units, TEGAM's 868/869 platinum RTD thermometers detect and display temperatures from -360 °F to +1100 °F. They're ideal for cryogenic and high-temperature research or industrial monitoring. For your flexibility, we provide a mating connector which allows you to use any 100 ohm RTD probe. These units are housed in heavy-duty ABS cases that are dust-proof, splash-proof and drop-proof.

- Accuracy: 0.3 °C
- 1° or 0.1° resolution
- °F or °C scales
- Big, easy-to-read LCD display
- One-year warranty
